

Flexo Plate Making Machine

Description:

This machine is set bask plate/wash plate/baked plate at one station, have PPD210/300/360 different model, using imported bask plate lamp, import transmission motor and imported dry vacuum pump. Plate-making high precision, easy operation, widely used in the label/non-drying label/ribbon head/PVC trademark/name card, etc., plate making use of printing.

Main Technical Data

Max plate size: 600 x 400mm

A. Bottom exposure 45-60 "

B. Main exposure 5 "-8"

C. wash plate 6"

D. dry plate 10"

E. post-processing 1-2 "

F. after exposure 10"

3. Cover motor: 90TDY4 0.09 kw

4. Axial flow fan: 150F2Y 0.025 kw

5. Meter fan: JF - 51 0.025 kw

6. Tubular heaters: SRQ1-220/0.5, SRS2-220/1 1.5 kw

7. Vacuum pump: 2 x 1-1/220V 0.18 kw

8. Required power: 2.3kw

9. Overall dimensions: (LWH) 930 835 1000mm

10. Machine net weight: 250KG

Dryer:

Dryer adopts sheet metal structure production, box wall space with siliceous aluminous fiber felt filling, in order to prevent heat diffusion, in which there are two layers of baking plate bed, korah out and pushed into, install plate is convenient. Box also equipped with two convection fan, a constant

temperature controller, in order to control the temperature in the cabinet equilibrium.

Electrical control system

Electric control system by operation panel, electrical wiring board and ballast board of three parts.

(1) operation panel located in the upper portion of the whole machine positive, the panels are installed on all sorts of function switch has indicating meter, quite convenient usage and maintenance.

(2) electrical wiring board, on the machine at the lower part of the rail groove, maintenance optional pull and push the, board with various relays and other components, is the center of whole machine electrical system, the board with external connection control circuits all adopt the branches and wiring board connection, easy maintenance.

(3) ballast placed machine bottom plate, the orbit of the slot, can be arbitrary pull and push the board with expose lamp, with the ballast, all external connections adopts branches and wiring board connection, easy maintenance.
